

Program

Tuesday, 29. Juni 2004

- 09.00 **Opening**
09.30 **New guidelines for the chemistry in the water-steam-cycle (1998–2004)**
- 10.15 Discussion
10.30 Coffee break
11.00 **Can the VGB guideline (from 1988) still be used without restrictions?**
11.45 Discussion
12.00 **Chemistry treatment in units with once-through boilers**
12.45 Discussion
13.00 Lunch
14.30 **Feed water treatment in units with circulation boilers**
15.15 Discussion
15.30 Coffee break
16.00 **Boiler water treatment**
16.45 **Forum discussion "Operating experience 1"**

Wednesday, 30. Juni 2004

- 09.00 **Steam- and power production in the industry -specific problems and the cycle chemistry**
09.45 Discussion
10.00 **Combined cycles (heat recovery steam generators) – typical problems (e.g. boiler tube failures) and the cycle chemistry**
10.45 Discussion
11.00 Coffee break
11.30 **Conditioning in district heating power stations, incinerator plants and small units with co-generation**
12.15 Discussion
12.30 Lunch
14.00 **Forum discussion "Operating experience 2"**
15.00 Coffee break
15.30 **Forum discussion "Monitoring of the cycle chemistry"**
16.30 **Final discussion**
